

Safety Through Technology

JeMS – Electronic Journey Management System

Hazard and Risk Identification are the most important aspects of HSE.

Well defined roles, responsibilities, and procedures, to conduct risk assessments, are incomplete without a proper system in place.

That's where JeMS plays its part. JeMS is a simple and easy to use application, that seamlessly aligns people, processes, and technology.

- ✓ Online Risk Assessment
- ✓ Score Based Electronic Approval
- ✓ Start-to-Finish Journey Tracking
- ✓ Intuitive Design
- ✓ Easy Configuration
- ✓ Secure and Reliable
- ✓ Rapid Deployment

WHY JeMS ?

JeMS is developed with two key aspects in mind, *User Experience* and *Quality*. Its intuitive design makes it very easy to use and in turn gains quick adoption by users.

JeMS provides peace of mind by providing real time information at your fingertips. It is a cost effective solution that helps organizations bring appropriate controls and pro-active actions to ensure safe journey each time.
